Professional Summary

Certified Odoo Developer with hands-on experience building full ERP systems from scratch. Specialized in OWL, custom modules, and dynamic frontend development, with solid backend integration using Odoo ORM and APIs.

Focused on delivering scalable, high-performance solutions with clean architecture and strong user experience.

Education

Bachelor of Communication and Computer Engineering

Faculty of Engineering, Shoubra, Benha University

GPA: 3.71 / 4.00 – Excellent with Honors

Work Experience

Odoo Developer — Plementus (Sep 2024 – Present)

- Developed and customized Odoo modules with backend and frontend integration
- Built dynamic UI using OWL and XML templates
- Implemented client and window actions to enhance workflows
- Developed Odoo websites with improved performance and UX
- Integrated backend services with frontend components using Odoo ORM and APIs
- Collaborated with cross-functional teams to deliver scalable and maintainable solutions

Certifications & Training

Odoo Functional Certification (FTCO) [2025]

- Certified in Odoo functional workflows, modules, and system customization
- Experienced in implementing business processes using Odoo ERP

Node.js Diploma - Route (2024)

- Built backend applications using Express.js, REST APIs, and authentication (JWT)
- Worked with MySQL, MongoDB, and deployment basics

Technical Skills

Odoo: Custom Modules, OWL, XML, Client Actions, Window Actions, ORM, Website Development

Frontend: JavaScript, React.js, HTML, CSS, SASS, Tailwind, Bootstrap
Backend: Python (Odoo), Controllers, REST APIs, Node.js (Basic)
Databases: PostgreSQL, MySQL
Tools: Git, GitHub

Projects

MOC Internal Management System (Saudi Ministry of Culture)

- Contributed to building a full internal system for managing operations such as maintenance and hospitality
- Developed and customized hospitality modules, including kitchen and kiosk interfaces, based on Figma designs
- Built a POS-like system from scratch integrated within Odoo using webview architecture
- Developed backend APIs for maintenance and cleaning services and integrated them with a mobile application
- Implemented real-time notifications using Firebase to handle order updates and system events
- Integrated frontend interfaces with backend logic to ensure smooth workflows across multiple system modules

Etatwir E-learning Platform (Odoo)

- Developed a full e-learning platform similar to Udemy using Odoo
- Designed and implemented a multi-role system supporting Individual users, Instructors, and Companies
- Built customized dashboards for each user type to manage courses, track progress, and monitor activities
- Developed dynamic frontend interfaces and integrated them with backend logic for seamless user experience
- Implemented structured course management workflows including enrollment, content delivery, and tracking

Plementus Website & Team Dashboard (Odoo)

- Developed the company website from scratch using Odoo, including custom theme, layouts, and responsive design
- Built a dynamic team management dashboard to track tasks, including completed, pending, and testing stages
- Implemented data visualization features with charts displaying monthly and yearly performance statistics
- Designed role-based views enabling team leaders to monitor their teams and overall system performance
- Integrated frontend components with backend logic to ensure real-time data updates and smooth workflows

Interpersonal Skills

- Strong collaboration and communication within cross-functional teams
- Problem-solving and debugging complex issues

- Effective time management and adaptability in fast-paced environments
- Analytical thinking and decision-making

Languages

Arabic: Native

English: Professional Working Proficiency
